Software

The Pomodo Cloud gives you access to your business from anywhere!

Easily manage customers and inventory with our base cloud solution.

Features Include:

User Management : Manage your users and set permissions based logins to ensure that your data is protected.

Configuration : Take control over your software with many configuration options to customize the software for your business.

Customer Management : Keep track of your customers including basic information, multiple addresses, purchase history, unlimited custom fields, and notes.

Inventory Management : Manage all the products and/or services you sell! Keep track of basic information, unlimited custom fields, quantities, unlimited price levels, and notes.

Price Check and Change : We provide a mobile, simple way to check and change pricing or quantity information for your products.

Transfers : Need an easy way to get inventory in and out of inventory? Use transfers for a quick easy way to move your products.

Purchase Orders : Manage your vendors and purchase orders on the Cloud, making it easy to receive new inventory.

Part #: POMO-C-BASE-1X

**The Pomodo Cloud Base is required for all other cloud modules and is included in all POS Solutions*

Software cont'd

Order Management

**Must have Pomodo Cloud Base*

Pomodo Order Management gives you the ability to process orders from anywhere with access to the internet!

On Site Orders : If you have sales reps in the field, Pomodo's Order Management makes it easy to take and submit orders from anywhere! Create quotes, shipments, or orders on the go, and everyone at the office can see and process them.

Wholesale or B2B Orders : Do you have a retail location, but also take B2B or wholesale orders from a back office or second location? You can use Pomodo Orders to easily take those orders and maintain a customer order history.

Phone Orders : If you take phone orders, Pomodo's Order Management is an easy way to access everything you need to quote and complete an order over the phone.

Other Modules you may like to complement Order Management:

- Advanced Orders
- Shipping Tools

Advanced Orders

**Must have Pomodo Cloud Base and Order Management*

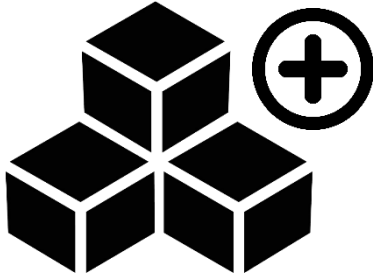

Pomodo's Advanced Orders Module in the cloud takes order entry up a notch with sophisticated features not available in basic orders.

Orders to Purchase Orders : Don't always have everything in stock? Do special ordering for your customers? This feature gives you the ability to create purchase orders by line item for anything on your order that you don't have readily available.

Order Custom Fields : We give you unlimited custom fields on your orders so that you can easily manage all necessary information by order. This give you endless possibilities without having to pay for custom development to make your orders specific to you and your needs.

P&L and Overhead : Get a better handle on your profit and loss and overhead costs per order. This information can be made readily available on your orders so you can analyze each order individually.

Software cont'd

Advanced Inventory

**Must have Pomodo Cloud Base*

Pomodo's Advanced Inventory Module in the cloud gives you special inventory options to make it easier to manage your inventory.

Package Types : Take full control over your inventory by purchasing, managing, and selling by different package sizes. Set up product families to tie different package sizes together so the confusion of breaking down larger packages doesn't cause problems with your inventory quantities.

Kits : Kits allow you to group items together either ahead of a sale, or at the time of order entry. Pull individual items out of inventory, and put them into kits available for sale.

Assemblies : Similar to kits, assemblies group items together, but with an assembly, you can remove items within that group at order entry. You also have advanced options like creating groups within your assembly, and making items required or optional within the assembly.

Accounting Export

**Must have Pomodo Cloud Base*

Pomodo's Accounting Export helps bridge the gap between your Pomodo Software and your Accounting System. It is our belief that Accounting Systems are great for just that, Accounting. Using an Accounting System alongside Pomodo, you will have the best of everything, especially when you have a simple way to get information from Pomodo to Accounting.

Pomodo's Accounting Export can be done in an iif Quickbooks file or a CSV file. We give you the ability to export high level sales general ledger information so that you can then easily import it in to your accounting software.

Does your accountant or bookkeeper work from a different location? No problem! With the Pomodo Cloud, you can give access to your accountant or bookkeeper so they can log in and get the information they need anytime, anywhere. Our user permissions give you peace of mind that no matter what user you set up, they are only accessing the information you want them to see.

Want something more integrated? Call us! We do custom integrations!

Shipping Tools

**Must have Pomodo Cloud Base and Order Management*

Pomodo's Shipping Tools give you the ability to manage your Pick, Pack, and Ship process so nothing slips through the cracks!

Our Shipping bump bar gathers your orders, and through a unique system of "queues" allows you to know what orders are at what stage of shipping throughout the entire process.

Once orders are shipped out, your inventory levels are adjusted and you can choose how you want to tender and invoice your customer. You can set timers to automatically tender your orders at the end of each day based on the tenders set up in your customers profile. Are they Net 30 days, are they prepay?

Once tendered, you can also choose to set up automatic emails, so that your customer gets an automated email at the end of the day in which their order got shipped out to them. Automated=Easy!

Prefer manual methods to review before sending? You can do that too!

Accounts Receivable

**Must have Pomodo Cloud Base*

Pomodo's Accounts Receivable module gives you the ability to manage your receivables in the cloud!

A/R Invoices : Keep track of your customers invoices that were tendered as accounts receivable.

Statements : Easily create statements for your customers manually or on a timer to ensure they are always informed of their balance.

Payments : Take payments and apply them to A/R Invoices for your customers.

Accounting : Send receivables over to QuickBooks by exporting a simple iif file

Headquarters

**Must have Pomodo Cloud Base*

If you have multiple locations and want to efficiently manage them all from one place, we have a Pomodo Headquarters to tie your whole business together.

We can set up unlimited locations for you including anything in the Pomodo Cloud, along with POS stations if needed.

Log in one time and access each individual location, or HQ where all location information is consolidated so you can see your business as a whole.

Products can be set for all locations, or you can specify what locations have what products. Automatically sync any changes you make!

Customers are global, so your customers can visit any of your locations and you will have access to their information.

No costly servers or software installation needed! Just log in and see your business no matter how big or small.

Support, Subscription, and Services

Subscription

**Included in Monthly Fee*

Your Pomodo Subscription is a monthly payment for the modules and features you have selected. This monthly payment is based off of your a la carte selections.

Monthly subscriptions can be cancelled at any time. There are no refunds for months where the payment has already been processed.

If you agree to a longer term contract, you will receive a discount off of your monthly subscription.

Support

**Included in Monthly Fee*

Support is included in all subscription plans. As long as your subscription is up to date, you will have access to our support team.

We offer 24/7 support to our customers.

Our regular business hours are 9-5 EST Monday-Friday.

We ask that if you have questions outside of business hours, please open a ticket or send an email and we will be in touch when we are back in the office.

If you have an emergency and need immediate assistance, you can reach our technicians after hours to handle those urgent concerns.

Ongoing Training

**Included in Monthly Fee*

We understand that new software can be a big undertaking for any business. There is a lot to take in and learn and sometimes it cannot all be done in one day.

We offer ongoing training after your initial training. Just call and schedule a time and we can do web training at no additional charge, or on site depending on your location for a fee.

Adding a new feature or module? Starting to use a new feature that you haven't used before? Set up training to ensure that you know exactly how everything works.

We typically do "train the trainer" sessions.

Support, Subscription, and Services cont'd

Import

We can help you get a database set up to help ease some of the data entry concerns you might have. If we have a starter database for your industry, we can make that available for you, or if you have the data in a spreadsheet and can put it into our template, we can import your data.

Industry Specific Database – Included in price of software

Basic Import: 5000 or less entries (items, customers, vendors combined)

Advanced Import: 5001+ entries

Onsite Installation and Training

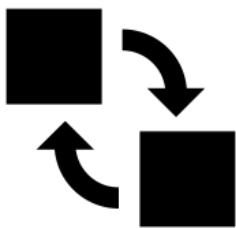

If you are getting a full POS system from us, we can come out on site and install the POS for you.

One of our experienced technicians will discuss your network details and wiring prior to installation to ensure that you are ready to get your system put in place.

On the date of installation we will come out to your site and install everything and ensure that everything is ready for you and you know how your hardware works.

We will also spend time with you showing you the software and training you on how to most effectively use the software for your business.

*Restrictions apply and pricing can vary based on location

Hardware Swap Out

If you purchase Hardware from us, it is covered under a next business day swap out service for as long as you have an active subscription with us for 3 years from the date of purchase.

If you have a problem with your hardware, and our technicians deem that you need a replacement, one will be sent out next business day to you. You will have to return the defective hardware within 7 days or your account on file will be charged for that hardware.

After a period of 3 years from your initial purchase date, you can choose to upgrade your hardware at the current hardware price to keep the swap out, or continue to use that hardware without it being covered under hardware swap out.

*See hardware swap out policy for details

Hardware – POS Terminals

All in One Touchscreen Terminal:

Windows 10
Solid State Drive, no moving parts
Commercial Grade
4GB Ram

All In One Touch Screen Terminal

Key Features:

Built for harsh retail environments

Fan Free with no moving parts

Operates in a wide range of environments and temperatures

Precisely designed for retail with a longer life expectancy, saving you money in the long run

Why Buy an All-In-One Touchscreen instead of a regular PC?

You get what you pay for!

The all-in-one terminals are built for retail businesses and restaurants, some of which run 24x7. These terminals have a longer life expectancy than a regular PC and are more reliable.

We cover your all-in-one terminal under a next business day swap out plan for 3 years from the date your purchase the hardware.
